

Retrospective B

Date: 11/11/2020

Time: 15:00

Team Members Present:

- Kaiqi Liang
- William Huang
- Tony Lu
- Richard Wang

Last retrospectives to try	What went well	What didn't go so well	To Try
<p>1. Check Jira before starting a new task and make sure it is not in the IN PROGRESS or DONE list</p> <p>2. Update Jira when starting a task so that other members can see it</p> <p>(Richard is assigned to enforce this to make up for his mistake)</p> <p>Update: Richard did what he was told and it improved our efficiency</p>	<p>What we did complete was of high quality and worked as expected</p>	<p>Did not finish sprint</p>	<p>Improve our planning and understanding of problem domain so we can start earlier next time</p>
<p>Introduce services like when2meet (William is assigned to start a when2meet schedule and better organise meetings)</p> <p>Update: William set up a when2meet and we organised meetings through it, helping us find common times</p>	<p>Evolved novelty idea so it could better reflect our initial goal of helping jobseekers find the best possible matches</p>
